

For Menifee County Schools Use Only

KY TRAIN COURSE ID NUMBERS FOR MEDICATION ADMINISTRATION

FOR UNLICENCED SCHOOL PERSONNEL MODULES

To access KY TRAIN: <https://ky.train.org>

If you have never taken a course on KY TRAIN, you must first create an account before proceeding.

Once you have begun the selected training module, you may click on “quit” at any time and return to the same training later at a time of your choice.

Before starting the online module, download the Medication Administration Training Manual that also includes the participant’s Study Guide. You may use the answers to the Study Guide to complete the online Final Exam. Upon achieving an 85% or more on the open book final exam, download the certificate of completion and take it to the licensed professional trainer (MD, RN or APRN) to complete the skill competency component.

If the trainer prefers to do face to face training of school personnel, that is up to the district to decide which method is best for their personnel and situation. The final exam may be accessed without taking the online course, however you must be registered and then forward through the online course to access the online final exam.

There is one online training module available. Register for the most appropriate one.

Course ID # 1028202: MEDICATION ADMINISTRATION TRAINING FOR UNLICENSED SHOOOL PERSONNEL- Regular and ER Medications. This training covers all the information on the administration of regularly scheduled medications and all three emergency medications and is the longest of the training modules.

PLEASE NOTE: IF YOU EXPERIENCE ANY issues with the online training program,
